

Biological treatment plant **BIO EASY FLOW WIRO 12**

The BIO EASY FLOW WIRO 12 sewage treatment plant is a single-chamber biological treatment plant intended for 3 to 12 permanent users (PE), in which the treatment processes are cyclical.

In BIO EASY FLOW WIRO sewage treatment plants, a pump is used at the outlet, which allows sewage to be discharged or managed regardless of the groundwater level and type of soil.

Basic parameters

Index	Model	Number of users	Capacity	Nominal flow	Length (L)	Width (B)	Inlet height (D)	Inlet depth (A)	Inlet/outlet height
			[m ³]	[m ³ /day]	[mm]	[mm]	[mm]	[mm]	[mm]
O/00187	BIO EASY FLOW WIRO 3-12	3-12 PE	5,25	1,8	2500	1825	1550	540	160/50
