

Underground rainwater tanks

from 1,470 to 7,500 liters

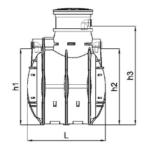

Rainwater tank 1470 l

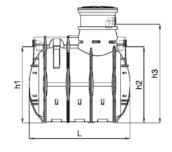

| | inlet diameter (mm) | inlet height (mm) | outlet height h1 (mm) | total height H (mm) | length L (mm) | Width D (mm) |
|---------------------|------------------------|----------------------|--------------------------|------------------------|------------------|-----------------|
| tank without filter | 110 | h2 / 1320 | 1290 | 1960 | 1356 | 1240 |
| tank with filter | 110 | h3 / 1720 | 1290 | 1960 | 1356 | 1240 |

Rainwater tank 2000 l

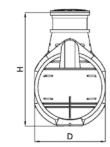

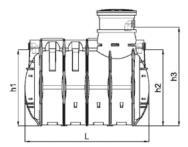

| | inlet diameter (mm) | inlet height (mm) | outlet height h1 (mm) | total height H (mm) | length L (mm) | Width D (mm) |
|---------------------|------------------------|----------------------|--------------------------|------------------------|------------------|-----------------|
| tank without filter | 110 | h2 / 1320 | 1290 | 1960 | 1756 | 1240 |
| tank with filter | 110 | h3 / 1720 | 1290 | 1960 | 1756 | 1240 |

Rainwater tank 2500 l

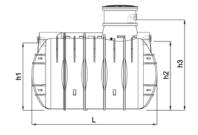

| | inlet diameter (mm) | inlet height (mm) | outlet height h1 (mm) | total height H (mm) | length L (mm) | Width D (mm) |
|---------------------|------------------------|----------------------|--------------------------|------------------------|------------------|-----------------|
| tank without filter | 110 | h2 / 1320 | 1290 | 1960 | 2156 | 1240 |
| tank with filter | 110 | h3 / 1720 | 1290 | 1960 | 2156 | 1240 |

Rainwater tank 3750 l

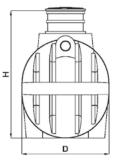

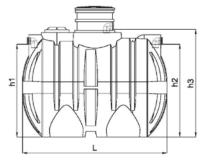

| | inlet diameter (mm) | inlet height (mm) | outlet height h1 (mm) | total height H (mm) | length L (mm) | Width D (mm) |
|---------------------|------------------------|----------------------|--------------------------|------------------------|------------------|-----------------|
| tank without filter | 110 | h2 / 1350 | 1320 | 2000 | 2450 | 1600 |
| tank with filter | 110 | h3 / 1770 | 1320 | 2000 | 2450 | 1600 |

Rainwater tank 4500 l

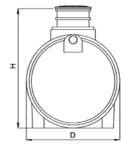

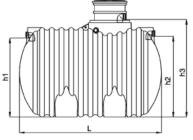

| | inlet diameter (mm) | inlet height (mm) | outlet height h1 (mm) | total height H (mm) | length L (mm) | Width D (mm) |
|---------------------|------------------------|----------------------|--------------------------|------------------------|------------------|-----------------|
| tank without filter | 110 | h2 / 1620 | 1590 | 2210 | 2500 | 1500 |
| tank with filter | 110 | h3 / 1870 | 1590 | 2210 | 2500 | 1500 |

Rainwater tank 6000 l

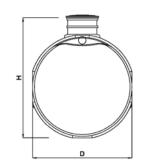

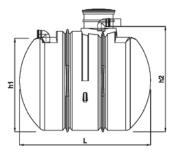

| | inlet diameter (mm) | inlet height (mm) | outlet height h1 (mm) | total height H (mm) | length L (mm) | Width D (mm) |
|---------------------|------------------------|----------------------|--------------------------|------------------------|------------------|-----------------|
| tank without filter | 110 | h2 / 1610 | 1580 | 2280 | 2840 | 1790 |
| tank with filter | 110 | h3 / 1950 | 1580 | 2280 | 2840 | 1790 |

Rainwater tank 7500 l

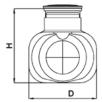

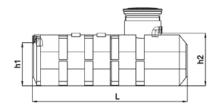

| | inlet diameter (mm) | inlet height (mm) | outlet height h1 (mm) | total height H (mm) | length L (mm) | Width D (mm) |
|---------------------|------------------------|----------------------|--------------------------|------------------------|------------------|-----------------|
| tank without filter | 160 | 2230 | 1900 | 2500 | 2770 | 2100 |
| tank with filter | 160 | 2230 | 1900 | 2500 | 2770 | 2100 |

Rainwater tank 2000 l GARDEN

| | inlet diameter | inlet height | outlet height h1 | total height H | length L | Width D |
|---------------------|----------------|--------------|------------------|----------------|----------|---------|
| | (mm) | (mm) | (mm) | (mm) | (mm) | (mm) |
| tank without filter | 110 | h2/930 | 770 | 1310 | 2745 | 1200 |

Additional accessories

Fixed and telescopic superstructures

TOP MULTI-TECH

Multistage submersible pump

Automatic switching on and off

Performance data

Efficiency up to 120 l / min (7.2 m³ / h)Lifting height: 42 m

Cut-in pressure: 1.5 bar

Application

TOP MULTI-TECH pumps are recommended for pumping clean water and liquids that are not chemically aggressive to the materials of the pump.

Due to their high efficiency and reliability, they are suitable for use in applications such as the supply of water from tanks, manholes or relatively deep wells, for collecting rainwater from tanks into water gardens, or for use in irrigation systems, etc.

An internal electronic device automatically starts or stops the pump when the valve is opened or closed.

BASIC cover

The standard manhole cover of a sewage treatment plant, pumping station or separator is available in green or black

PREMIUM cover

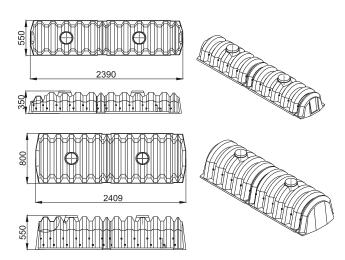

It is characterized by a modern look thanks to its flat design and increased load resistance

KAMELEON cover

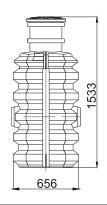

Thanks to a special recess, it allows the cover to be adapted to the environment, e.g. grass, stones, bark, etc. and facilitates mowing the lawn.

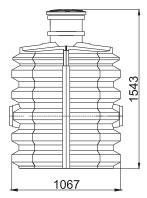

Infiltration tunnels

Tunnel drainage is ideal for draining excess rainwater on the plot. The main benefits of the use of infiltration tunnels include uncomplicated and quick assembly, the possibility of connecting modules into lines of any length, light structure and the possibility of building an underground system, thanks to which we can rationally manage the area.

Absorbent well 600 mm, 800 mm
