

Water-meter wells

The water meter well is made of a monolithic high-density polyethylene tank.

Inside the well, there are access steps that allow enter to the tank.

The tank is topped with a 600mm diameter extension and a light type cover made of polyethylene.

Basic parameters

| Index | Name |
|--------|---|
| P/0018 | Water-meter well TYTAN \varnothing 1000x1500 |
| P/0003 | Water-meter well TYTAN \varnothing 1000x2000 |

The well is equipped with a tight inlet and outlet connection made of a PE pipe with a diameter of \varnothing 32, enabling the connection of a water meter (it is possible to change the diameter of the connections to \varnothing 40)
